Continuous Mortar Mixers WETMIX

Description and working principle

WETMIX Continuous Mortar Mixers by DYNAQUIP are the ultimate mixing devices for any type of mortar supplied in building-site silos. Thanks to their technical design features and innovative materials they are perfect for a great variety of mortars and plasters. The self cleaning mixing chamber, which is lined with DYNAQUIP's wear resistant, non-stick engineering polymer SINTER, makes clean-out of the machine child's play. Disassembly and re-assembly of the mixing shaft and the replaceable chamber is done in no time.

Performance and technical features

- Dry feeding and conveying section
- Wet mixing section consisting of replaceable chamber made of engineering polymer SINTER
- Combined feeding, conveying and mixing shaft made of engineering polymer SINTER with separately replaceable mixing tools
- Direct DYNAQUIP made gear motor drive
- Outlet safeguard made of engineering polymer SINTER

Advantages and innovative features

- Small overall dimensions
- Lightweight design
- Outlet safeguard in compliance with CE-regulations
- Easily replaceable tool shaft and mixing chamber, both made from engineering polymer SINTER
- Low energy consumption
- Low investment cost = quick return on investment
